

À l'aide du framework PHP Laravel 10 et VueJS 3/ TypeScript (composition api), créer :

- Un backoffice permettant de créer/modifier/supprimer les fiches « star » (nom, prénom, image, description)
- Une page publique permettant d'afficher de manière responsive sur mobile et desktop le contenu des fiches.

Indications :

- Front : L'utilisation de TailwindCSS, SCSS et NuxtJS est un plus, n'hésitez pas à découper vos composants et utiliser les composables pour le code métier.
- PHP/Laravel : l'utilisation de seeders, factories, tests unitaires, typage, validation (form requests) est un plus
- N'hésitez pas à commenter votre code et créer des commits sur git au fur et à mesure de votre progression
